
GIS Workshops

Earth Design Consultants, Inc.
230 SW Third St., Suite 212
Corvallis, OR 97333

Leaders in the application of GIS technology in
the Pacific Northwest since 1996.

Picture Yourself Using GIS . . .

- Understand the nature of spatial data
- Understand basic GIS terminology
- Learn how to work with GIS software
- Practice selecting monitoring sites
- Practice analyzing spatial data
- Learn what to expect from your contractors

All classes held in a state-of-the-art computer lab on the Oregon State University campus in Corvallis, OR using ESRI ARCView and ARCMAP software.

Earth Design has the right class for you:

Conceptualizing GIS (\$125)

No GIS experience needed.

Learn how to ask questions that can be answered using GIS and how to incorporate GIS data into your research. You can take the lab component (Monitoring GIS) in the afternoon. ½ day (morning)/12 person max.

March 25 and 26

Monitoring GIS (\$125)

This lab component can be taken right after Conceptualizing GIS. Some GIS experience recommended.

Computer lab session where participants get a chance to work with a GIS to answer specific questions using existing spatial data sets. ½ day (afternoon). 12 person max.

March 25 and 26

Data management strategies for watershed councils. (\$250)

Some GIS experience recommended.

Make your watershed council's GIS central to its action planning. Full day. 15 person max.

March 19

If the above dates do not work for you, call us at 541-757-7896 to schedule a class for a different date. We expect to offer more classes in June—call or check our website at www.earthdesign.com for the current workshop schedule.
